

StampaJet XP-64

StampaJet XP-64 - Digital Textile Pigment Printer

StampaJet XP64 a new generation cost effective textile printer, utilizing an all in one fabric transport system and curing station, designed for digital fabric printers who require easy to use equipment, high print speeds and outstanding quality. The StampaJet XP-64 with its integrated, ink and fabric versatility and exceptional color control, combined with a competitive price and small footprint opens new opportunities to textile digital printing.

Plug & Print Digital Textile Printer

Digital textile printing is finally made easy thanks to the StampaJet's top quality print results at production speeds of up to 12.5 linear yards per hour* in 8 color printing mode. The machine requires minimal assembly and ships with our proven Evolution RIP® software which makes fabric printing simple and repeatable. Just connect the electric power, load the inks and go.

*Depending on color number, resolution and pass - see the production table on the back side of the brochure.

New Print Head Providing Speed, Versatility and Quality

The StampaJet XP-64 comes with the new extra wide 8 channel variable dot Epson print head addressable to 1440 DPI. Two staggered print heads allows for high resolution high speed printing. On board cleaning and maintenance provides quick and easy head cleaning providing trouble free.

Integrated Fabric Handling and Curing System

The fabric transportation system allows users to load a wide variety of fabrics to print and cure without the time or labor of a two step process. A precision winding and unwinding mechanism moves fabric precisely and smoothly through the curing system providing the correct amount of fixation time. StampaJet is ideal to print on a wide variety of fabrics.

Winding and Unwinding System

StampaJet XP-64 allows for large roll up to 220lb to be loaded on in order to give a user the ability to do large unattended runs.

Hot Air Curing Dryers

StampaJet XP-64 utilizes hot air curing in a self contained chamber and ships with an air cleaning system. Loading fabric into the dryer is hands free providing a user piece of mind that they cannot get burned. The curing chamber is digitally controlled for optimal working temperature and speed.

Bulk Ink Supply System

The StampaJet XP-64 can print with pigment and disperse sublimation inks via a refillable bulk ink feed system or 440ml pre-filled ink cartridges.

DigiFab Systems

MODEL	StampaJet XP-64
Printer	Variable dot piezo print heads
Print heads - Colors	2 extra wide 1440 nozzles piezo print heads, 8 channel, 8x180 nozzle rows
Print heads level	Manual print head level adjustment for different media thickness
Print head cleaning	Automatic print head cleaning cycle
Print Resolutions	360 - 540 - 720 - 1080 - 1440 dpi 2, 3, 4, 8 or more passes - unidirectional & bidirectional
Fabric transport	Automatic roll unwind and rewind units, with speed/tension control
Print width, roll size	Maximum print width: 161 cm (63,3") Maximum roll size may depend on weight (up to 220 lbs)
Print speed / Resolution	8 Color Print Mode and Speeds, additional mode optional 720 x 720 dpi, 6 pass, bidirectional, 140 ft ² /h or 9.3 linear yd/h 720 x 360 dpi, 6 pass, bidirectional, 260 ft ² /h or 17.3 linear yd/h 360 x 360 dpi, 2 pass, bidirectional, 500 ft ² /h or 41.6 linear yd/h
Ink feed system	Ink feed system 2 x 4 or 1 x 8; Prefilled or Refillable Ink Cartridges
Inks	Acid, Reactive, Disperse, Pigments, Sublimation 4 colors or 8 colors
Interface	Network 10/100 BaseT
Noise level	50 dB - 70dB (printer only - does not include exhaust)
Dimensions	Width: 102" - Depth: 34" - Height: 67" Weight: 950 lbs
Electric supply	Printer: AC120V - 240V - 50/60Hz Curing Unit : AC 220-240V - 50/60Hz - 30Amp installed power - working power may be lower
Working environment	Temperature range: 20-35 °C/ 68-95 °F - Humidity 35-65 % rh
